

Episode 6: Mapping Manager – Lookup Table Creation Q&A

QUESTIONS AND ANSWERS

<p>Can you use Lookup tables in Mapping Manager to remove Allowances that are needed on the Invoice Import?</p>	<p>If an Allowance field on an Outbound Invoice is required, it should show as required based on the Trading Partner’s specifications.</p> <p>Unless you have direct communication from the Trading Partner that it is not required, you will need to send the Allowance.</p>
<p>Can Ship On and Pick Up On Dates be based on DTM or REF codes 002 and 118 be mapped using a Lookup Table?</p>	<p>Regarding utilization of a Lookup Table to modify dates, if you would like to enter a number of days to extend a date by, we can use our Mapping Manager function @DATEADD to change dates.</p> <p>You can review all of our various Mapping Manager functions by clicking the following link:</p> <p>https://help.truecommerce.com/en/articles/6666635-mapping-manager-function-logic-cheat-sheet</p>
<p>What is the difference between setting up a Lookup Table for Item Codes versus using the native Item Catalog function?</p>	<p>We recommend reviewing the explanation and example provided in the recorded Mapping Manager Part 2: Lookup Table Creation webinar beginning at the 23:30 minute mark. You can view this particular webinar by clicking the following link:</p> <p>https://register.gotowebinar.com/recording/6873507208587069359</p>
<p>Is it possible to report on which Lookups have been populated at the Trading Partner level?</p>	<p>This is an excellent suggestion!</p> <p>Currently this function does not exist within Transaction Manager, but we have submitted a formal request to have it added.</p>
<p>Can I create Lookup Tables for Item# and SKUs, too?</p>	<p>Absolutely!</p> <p>A specific example of how to do this is provided beginning at the 12:00 minute mark of the recorded Mapping Manager Part 2: Lookup Table Creation webinar. You can view this particular webinar by clicking the following link:</p> <p>https://register.gotowebinar.com/recording/6873507208587069359</p>
<p>How do I delete a Lookup Table?</p> <p>From what I understand, I would have to change the maps first before I can delete a Lookup Table. Does Mapping Manager prohibit the deletion if there are links?</p>	<p>Navigate to Partner Maps > Options > Lookups and select the Lookups table or tables you wish to delete in the grid, then click the Delete button. The selected Lookup table(s) will display in red. Clicking the Save button will delete the selected table(s).</p> <p>NOTE: You can only delete Lookup Tables that are created at the customer level. TrueCommerce provides several Lookup Tables by default depending on the framework integration the customer purchases (for example, payment terms, ship to codes and more that may pertain to a particular business system), and these can only be removed by submitting a request to our Support Services team via Account Management in Foundry.</p>

Episode 6: Mapping Manager – Lookup Table Creation Q&A

QUESTIONS AND ANSWERS

	<p>If, however, you create a Lookup table that you don't need or maybe created in error, simply follow the navigation provided in the first paragraph of this response to delete it.</p>
<p>The Item Catalog automatically adds new items to it when the customer orders a new item.</p> <p>Is that something that can be added to a Lookup Table, or do we need to manually monitor it?</p>	<p>The Item Catalog and Address List contain those abilities, but Lookup Tables do not.</p>
<p>Our TrueCommerce package does not currently include Mapping Manager.</p> <p>Are we able to add it at any time, if needed? Who do I talk to about adding it?</p>	<p>It certainly can be added at any time!</p> <p>If you are interested in purchasing access to Mapping Manager you can contact your Sales Account Manager to discuss costs. Their contact information is available via Account Management in Foundry.</p>
<p>Can I map a Lookup to the same field (meaning to replace bad UPCs on a Purchase Order with the correct UPC)?</p>	<p>In theory, yes.</p> <p>Lookup Tables can convert anything to anything, one to one. For example, if your trading partner has been getting your UPCs wrong (they add an extra zero to the beginning of the UPC and you need to pull that UPC into your system withOUT the leading zero), you can certainly accomplish that by lining up the UPCs the trading partner is sending you with the UPCs that actually are correct for your system.</p>
<p>Will there be more webinars soon?</p>	<p>You can keep on the lookout for any upcoming (or past/recorded webinars) by searching the Help Articles under the question mark icon in the top right of the screen when you are logged into Foundry. Meanwhile, following are the Fall and Summer Webinar Series articles, which include links to past/recorded and upcoming webinars:</p> <ul style="list-style-type: none"> • TrueCommerce Webinar Series: Fall 2022 • TrueCommerce Webinar Series: Summer 2022
